**DETAILED ACTION**

**Response to Amendment**

1. In response to the Amendment received on November 6, 2006, the examiner has carefully considered the amendments. The examiner acknowledges the cancellation of claims 74-78.

**Terminal Disclaimer**

2. The terminal disclaimer filed on October 17, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Application numbers 10/780,987 and 10/780,989 has been reviewed and is accepted. The terminal disclaimer has been recorded.

**Allowable Subject Matter**

3. Claims 1-15, 17-22, 24-60, 63, and 71 are allowed.

4. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is the limitation defining the tackifier ash having a "residual monomer concentration of less than 600 ppm by weight based on the weight of the tackifier resin", wherein the tackifier comprises an aromatic monomer and at least one acrylate monomer as repeating units in a radiation curable composition comprising the composition as found in the instant claims. Additionally, the prior art made of record does not expressly teach, alone or in combination, a radiation curable adhesive composition as defined in the instant claims that comprises a tackifier resin that has been produced by the process of contacting said tackifier resin in a product resin stream with a carrier that removes a portion of at least one residual monomer for the tackifier resin product stream. Said adhesive composition as defined by the instant claims is deemed allowable in view of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
